PROFILE SUMMARY

- **Full Stack Developer** with **2 years 6 months+** of experience in **Node.js, NestJS, Java, Spring Boot, React, and RESTful APIs**, working within a **Microservices** Architecture. Strong analytical and problem-solving abilities, with experience in developing software solutions in **Agile** environments.
- Thorough **professional**, I am passionate about delivering high quality software solutions that are robustly built and meet end-user expectations.
- Committed to **continuous learning**, I am seeking opportunities to apply and grow my technical skills by developing modern web applications and contributing to innovative projects.

TECHNICAL SKILLS

- **Programming Languages:** Java, C++, Python
- **Backend Technologies:** Node, NestJS, Spring Boot, Hibernate, JPA, REST API, Sequelize
- **Frontend Technologies:** HTML, CSS, JavaScript, TypeScript, React, Angular, Redux, Bootstrap
- **Databases & Messaging:** SQL, PostgreSQL, MongoDB, Redis, RabbitMQ
- **AI & LLM Technologies:** Gen AI, Cursor AI, Gemini, Claude, AWS Bedrock, RAG
- **Developer Tools & DevOps:** Docker, Git, GitHub, Postman, SVN, Burp Suite, WinSCP, Confluence, Jira

EDUCATION

National Institute of Technology Raipur	09/2021 to 05/2024
Master of Computer Applications (MCA)	CGPA: 9.23
Shaheed Sukhdev College of Business Studies, University of Delhi	07/2018 to 05/2021
Bachelor of Science (Hons.) in Computer Science	CGPA: 8.95

WORK EXPERIENCE

Software Engineer Wizni Software Pvt. Ltd. (ARIVE)	(12/2025 – Present) – Full Time
• Working on ARIVE's Loan Origination System (LOS), enabling end-to-end mortgage loan processing across POS, underwriting, and closing workflows. • Developing and maintaining scalable backend APIs using Node.js, NestJS, and TypeScript within a microservices architecture. • Enhancing existing APIs and optimizing performance to reduce latency and improve response time. • Implementing asynchronous communication using RabbitMQ for efficient inter-service data flow. • Contributing to Product Pricing Engine (PPE) for automated loan eligibility and pricing logic. • Performing feature development, bug fixes, and unit testing, ensuring high code quality and system reliability. • Working with PostgreSQL/MongoDB, Docker, and Git in a scalable, production-grade environment. • Developed an AI-powered mortgage guideline extraction system using AWS Bedrock (Claude LLM) to convert complex PDFs into structured underwriting tasks. • Designed intelligent document processing with RAG-based retrieval and direct PDF parsing, supporting 30+ lenders and multiple loan programs. • Improved efficiency by automating analysis of large guideline documents, reducing manual effort and faster delivery.	

- Analysing customer requirements in collaboration with Business Analysts to review and finalize specifications.
- Designed and developed web applications such as the Loan Disbursement System for **United Overseas Bank (Singapore)**.
- Implemented backend **microservices** using **Java (Spring Boot)**, building **RESTful APIs** and efficient CRUD operations with **Hibernate/JPA** for relational data management.
- Contributed to the Trade AI platform by developing **MERN**-based web modules, integrating **React.js** frontends with **Node.js/Express** services for real-time, API-driven interactions.
- Directly responsible for troubleshooting **Production Severity 1** and **Severity 2** Defects raised by the customers of United Overseas Bank.
- Analysing and fixing defects raised in **JIRA** tool, identifying faults, determining the root cause in applications developed using Java, following the Service Level Agreement.
- Participated in security vulnerability fixes, performing **VAPT** and **DAST** tests using **Burp Suite**, **Veracode** and **SONAR** scans to detect and fix issues such as SQL Injection and Cross-Site Scripting, ensuring application security compliance.
- Release management of software into Test Environments to facilitate SIT, UAT and finally into production.
- Maintaining accurate documentation, communicating progress with stakeholders, ensuring timely closure of Jira tickets.

ACADEMIC PROJECTS

EcoCart - Ecommerce Website

[Source Code](#)

- Designed and developed an E-commerce Website having standard functionalities like Customer Registration and Login, Product display, filter by Product Categories and Price, add to Cart, and checkout using dummy payment.
- Designed and built this scalable, dynamic website using the MERN stack (**MongoDB, Express, React, Node.js**).
- Optimised the website for a fully responsive UI, ensuring a seamless and user-friendly experience across desktop, tablet, and mobile devices.

STRENGTHS

- **Attention to Detail:** Analytical mindset with precise problem-solving skills
- **Pressure Handling:** Delivers quality results under tight deadlines
- **Adaptability:** Quick learner, flexible with new tools and technologies
- **Proactiveness:** Self-motivated with a strong results-oriented approach
- **Teamwork:** Collaborates effectively with cross-functional teams
- **Continuous Learning:** Dedicated to constant skill and career growth

VOLUNTEERING & ACHIEVEMENTS

- **Crescendo'20, The Annual Cultural Fest of SSCBS (DU)** - Core Member responsible for the development of a responsive website to promote the event, for sponsorship, poster making.
- **Coding Proficiency:** Solved **350+ coding problems** across multiple platforms, showcasing strong problem-solving and algorithmic skills.
- **Competitive Exam Excellence:** Secured All India Rank (**AIR**) **687** in the **NIMCET 2021** examination.
